CHISOM NWIKE

Senior Software Engineer

A senior software engineer with 6 years of professional experience in software development, proficient in C#, .NET Core, MS SQL, React, golang, Git, Azure DevOps, and related tools. Experienced in designing, building, testing, and using software applications, database design, and SQL. Skilled in working with Azure DevOps and Git, and implementing continuous integration and deployment processes. Experienced in front-end web development with React and modern web development tools, comfortable in both Agile and Waterfall development methods, and eager to learn and improve skills. A highly skilled software engineer confident in being a valuable asset to any company in need.

Technical Profile

- SQL
- JavaScript
- HTML
- CSS
- .NET
- MySQL
- ASP.NET
- React
- Docker
- jQuery
- SQL Server
- PostgreSQL
- GitHub

Work History

2021-08 - Current

Senior Software Engineer

Azenia - Equity Bank

- Excellent collaboration and communication skills, honed through experience in working with cross-functional teams in fast-paced, deadline-driven environments
- In-depth knowledge of microservice architecture and hands-on experience in building RESTful APIs for digital banking systems
- Adept at implementing robust security protocols to ensure the confidentiality and integrity of sensitive banking information

2022-04 - 2022-12

Senior Software Engineer

Flutterwave, Lagos

- Designed and implemented scalable and fault-tolerant solutions for high-traffic payment processing systems using Flutterwave
- APIs and integrating with external clients' systems

- Microsoft SQL Server
- Flutter
- React Native
- Postman
- Firebase
- Network Configuration
- Go
- Golang
- C#
- Elastisearch
- MongoDB
- Kafka
- Redis
- SQLite
- .NET Core
- Entity Framework
- Dapper
- Visual Studio Code
- React.js
- Vue.js
- Microsoft Visual Studio
- ASP.NET Core MVC

Competencies

Technical Analysis ■■■■☐

Team reporting ■■■■☐

Testing and maintenance ■■■■☐

Database programming ■■■■☐

Algorithm implementation ■■■■☐

Performance Optimization ■■■■☐

Requirements gathering ■■■■☐

- Provided technical leadership and mentorship to a team of software engineers, helping to grow their skills and expertise in software architecture and design
- Collaborated with product management and other stakeholders to define technical requirements and prioritize product roadmap items based on business value and technical feasibility
- Contributed to the development of a scalable and secure payment processing platform using best practices in software design, development, and testing
- Maintained deep knowledge of relevant technologies, standards, and best practices in software engineering, and provided recommendations for incorporating emerging technologies to improve product development and delivery.
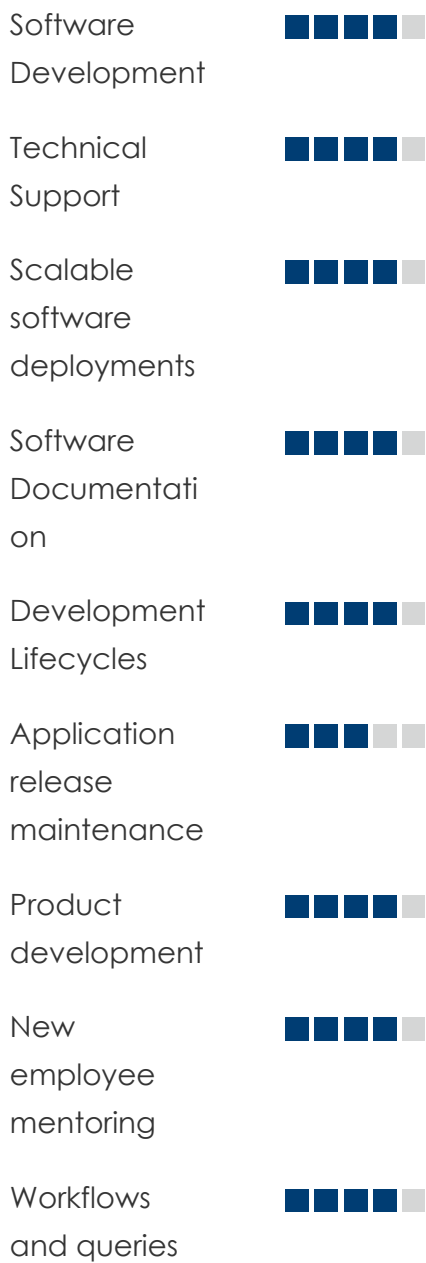

2020-01 - 2021-07

Senior Software Engineer

Polaris Bank

- Created and implemented digital banking solutions to meet customer needs
- Collaborated with other engineers to design and develop digital banking application for Polaris bank
- Provided support and maintenance for existing software and business processes
- Resolved customer issues and identified areas for improvement
- Reduced customer image data processing performance for Polaris' Central Processing Team's review
- Conducted code reviews and provided feedback to other engineers
- Documented software design and process
- Participated in architecture, design and implementation of back-end features using Microservices architecture, C#, .NET Core, EF Core

2019-01 - 2020-07

Brinq Africa

- Led team of software engineers in development of new Bills payment platform
- Implemented new software development process that increased productivity by 30%
- Developed new software application that helped the company increase sales by 20%
- Worked with project managers, developers, quality assurance and customers to resolve technical issues
- Demonstrated experience and good hands-on programming experience C#. NE, Python and Angular
- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations

Education

2022-09 - Current

Master of Science: Cybersecurity and Penetration Testing

Middlesex University - London, ENG

2011-11 - 2017-02

Bachelor of Engineering: Environmental Engineering

University of Port Harcourt
